| Fri Dec 2, 2022 | Student Learning Experience Survey | to do: 11:59pm |

Late Work Policy

You must submit all assignments before the due date. We do not accept submissions if the deadline is missed. If you do not submit before the due date, you will receive no credit.

However, we do have a "revision grace period" policy for the quizzes and assignments. If you are unable to fulfill an assignment, project step, or quiz to your satisfaction before the due date--for any reason--you may notify the TA (via a Canvas comment or email along with the original on-time submission) that you plan to submit a revision. You may then submit a revision within 3 days. Discussion posts and the Final Report assignment are not eligible for late revisions.

If you 1) submit a partial fulfillment of the requirements before the due date, 2) notify the TA when you submit your first attempt, and then 3) resubmit a revised version of your work within 3 days, your grade will reflect your final submission only without incurring penalties. If you do not resubmit within 3 days, your grade will reflect your original (potentially incomplete) submission.

Exceptions may be made at the instructor's discretion for documented emergencies e.g. hospitalization, or extraordinary extenuating circumstances.
